FOCUS ON CHILDHOOD AND YOUTH

The future belongs to the young, and a good education is the prerequisite for a self-determined life that offers equal opportunities.

The DP Helperknapp supports the work of the current College of Aldermen and would like to put the emphasis on exchange with children and young people, a good prevention work and a far-sighted strategy for this area. We want to create free spaces for young people in public spaces, improve the public transport network and improve the mobility of young people, and above all establish a structured cooperation between all parties involved.

IN CONCRETE TERMS, THIS MEANS :

- Supervised youth center
- More RGTR lines
- Shuttle buses for events and a new local busline within the municipality
- Inter-generational project connected to a new citizens' centre
- A steering committee

SPORTS AND LEISURE

An active community is a lively community

A variety of leisure activities enliven the community and are a part of social life. The college of alderman has assigned the vast majority of empty rooms to specific uses (for club rooms, meeting rooms, external rentals). The DP Helperknapp wants to proactively expand the range of sporting and cultural events by providing the necessary venues and more resources.

IN CONCRETE TERMS, THIS MEANS :

- Developing and supporting cultural offers
- Libraries
- Multisports fields & bike park
- Optimisation of existing playgrounds

ENERGY AND ENVIRONMENT

For effective climate protection, all stakeholders must pull together

The public sector must live up to its responsibility as a role model for renewable energies and energy efficiency, and switch to appropriate technologies. The DP Helperknapp applauds the great efforts of the College of Aldermen for renewable energies, and is hoping to support not only a boost to renewable energy production and research, but also boost the acceptance of such measures by all citizens.

**IN CONCRETE TERMS,
THIS MEANS :**

- Wind farms and solar power plants
- More electric terminals
- Modernizing the municipal fleet
- Expand the subsidies system
- Sustainable events

INFRASTRUCTURES FOR THE FUTURE

Modern, citizen-focused buildings and infrastructures are the foundation of good municipal services

A municipality's mission is to provide infrastructures that meet today's standards. The DP Helperknapp will make full use the potential of digitalization and put progress the service of citizens. In addition to infrastructure expansion and construction, we also want to make headway on the housing crisis and support alternative forms of housing (social housing to buy or rent, alternative housing such as Tiny Houses).

**IN CONCRETE TERMS,
THIS MEANS :**

- Citizen's house
- Forest nursery
- Living spaces
- Tiers-Lieux
- Multi-generational housing
- Additional public digital displays
- Digital displays at bus stops

SOCIAL COHESION, OUR BLUE THREAD

A municipality has the responsibility to bring its citizens together and strengthen their cohesion

The DP Helperknapp is committed to the continued development of citizen participation and supports projects that bring the community together. This can be done by supporting existing festivities, events and services, but also by introducing new social projects, such as the intergenerational Thillenloch project.

IN CONCRETE TERMS, THIS MEANS :

- Continued citizen participation
- Language Cafés
- Support for local clubs
- Tiers-Lieux in all villages
- Residential projects

THE THIRD AGE MUST NOT BE FORGOTTEN

The life experience of our seniors is a source of enrichment for our community

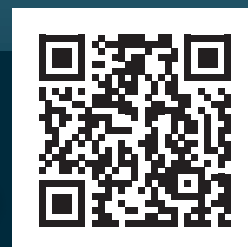

A strong intergenerational togetherness enables us to all live together under better circumstances! The DP Helperknapp will create the circumstances to enable our elderly citizens to live, for as long as possible, an independent and enjoyable life at home.

With more and better quality services for the elderly (such as health and travel transportation, seniors' clubs and lifelong education) and systematic integration into everyday life, our fellow citizens remain active members of our society, even in old age.

IN CONCRETE TERMS, THIS MEANS :

- Citizen services
- Digital training
- Intergenerational project
- Supporting and investing in regional CIPAs
